*****To Whom It May Concern*****

I am pleased to write this letter of recommendation for Aryan Mittal (Amity International School - AIS, Vasundhara Sector 6), who successfully completed a two-week shadowing internship at CogniTENSOR in June 2024. Throughout this short but intensive duration, Aryan consistently demonstrated a high level of enthusiasm, curiosity, and professionalism, which made him stand out as a student of exceptional calibre.

CogniTENSOR is a forward-thinking AI company which is at the forefront of India's ESG sector. At CogniTENSOR, Aryan was exposed to various facets of AI, data analysis, and automation, across a range of industries, from electronics manufacturing to sustainability. Aryan quickly adapted to the technical environment and was eager to understand the intricacies of our operations – his ability to grasp complex concepts in a short period was commendable and showed that he had spent time studying independently in preparation for his shadowing experience.

As his supervisor, I was glad to see that Aryan frequently showed initiative in seeking deeper knowledge beyond what was required. He engaged with other engineers and team members with thoughtful questions and took diligent notes, showing a sincere interest in both the technical and organizational aspects of CogniTENSOR. His observational skills and analytical thinking allowed him to make meaningful connections between theoretical knowledge and real-world applications, which will help him in any field he chooses to join in his undergraduate studies.

What I would also like to share about Aryan is that he was respectful, punctual, and cooperative throughout the internship, and he worked especially well within a team and showed a maturity that is rare at his age. His strong work ethic and positive attitude made a lasting impression on the staff he interacted with and we continue to remember him fondly as a part of our team.

I am confident that Aryan has the potential to excel in any academic or professional endeavor he pursues. His time at CogniTENSOR reflects both his capability and commitment to learning and growing in the field of Engineering, which I am aware he is applying to study at university, and which I am absolutely sure he will thrive in.

Please feel free to contact me if further information is required.

Sincerely,

Pooja Kumari
HR Manager
